

MOTORHOME TRAVELLING IN THE ALGARVE

The Algarve Region has become a major tourist destination for motorhome travelers in Portugal. It is also one of the most visited regions in the European and Mediterranean setting, particularly during the winter and spring months. The Algarve Region is sought throughout the year by a diverse and active motorhome community, increasingly demanding and seeking for high standards of quality. Motorhome travelers can find many reasons and several areas of tourist interest across the whole region; its pleasant climate and milder winters, warm and welcoming people, beautiful landscapes with a high environmental quality, a rich cultural heritage and the traditional flavours of the Algarve gastronomy, as well as many tourist services the region has to offer. For all of this motorhome visitors, unlike any other region or tourism niche, became remarkably loyal to the Algarve Region.

Over the last years Motorhome travelling has become a privileged way to visit, to get to know and enjoy the Algarve Region any time of the year. Moreover long stay vacations allow motorhome users, like no other way, to admire and fully enjoy the whole region in all its plenitude and diversity. You may take part in local daily life and meet the local communities. By the region's quality and by motorhome unique characteristics it is indeed a privilege to be a motorhome user in the Algarve.

THE ALGARVE MOTORHOME SUPPORT NETWORK (RAARA)

Motorhome touring has grown significantly over the past years throughout the Algarve Region. To deal with this increasing demand, to endow the region with a qualified tourism offer and also discuss matters regarding the Algarve's landscape protection and safeguard, namely its susceptibility and vulnerability, the regional entities have initiated a process in order to establish a high quality standard motorhome support network across the Region.

The "RAARA"

The network comprehends up to 30 different sites; camping and caravan sites (PCC), Rural Camping Parks (PCR) Service Areas for motorhome users (ASA). With the necessary infrastructures these sites are fully equipped in order to provide motorhome users all the facilities needed. Currently these areas are the only ones operating within a legal framework and properly licensed. Thereby these sites are the only ones where staying or parking overnight is allowed. Also the Support Network offers a wide variety of options and all of them provide a setting of quality, comfort and safety conditions required by motorhome travelers.

Helpful hints:

- . Look for Algarve Motorhome Support Network members to park overnight. The sites are identified with the network's symbol;
- . Avoid remaining or staying overnight in illegal, unlicensed nor unidentified parking areas. These sites have been emerging in the Algarve and do not comply neither with the comfort nor with the safety standards required by the existing legislation;
- . Do not remain or stay overnight in unauthorized areas, such as parking places, roadways, parking places located near the beaches, cliffs, sand dunes, pinewoods, etc. These parking areas cannot provide the facilities and services you might need (water supply, electricity, waste disposal, WI-FI, etc.), neither the comfort nor the safety required. By staying in these illegal spaces you are breaking the law and the current regulations;
- . The stay or overnight stay in either one of the places mentioned, poses serious public health problems and have a negative impact over the delicate environmental balance of these areas, due to their environmental and landscape specificities. It also represents a potential risk to all motorhome users regarding safety as well as the unexpected occurrence of natural phenomena;
- . The stay and overnight stay in illegal, unauthorized spaces may be subject to the local authorities intervention.
